

# Global Plastic Action Partnership (GPAP)

GPAP brings together key players across multiple sectors to take collaborative action on tackling plastic pollution in developing countries. The UK has committed £20.5 million globally to its support. GPAP acts by:

- Building dialogue and cooperation platforms called NPAPs.
- Generating knowledge based in evidence and inclusive roadmaps.
- Catalysing and implements strategic actions.
- Paving the way for a future global plastics treaty.

## What does the programme do in Colombia?

In Colombia GPAP will be integrated with the national objectives and plans of climate and biodiversity and will deliver the following outcomes:

Synthesis of impacts of plastics on biodiversity

Baseline Analysis and Future Scenarios

Gender and social context analysis

GESI Action Roadmap

Funding Roadmap

## How does this programme support colombian priorities?

- GPAP tools and resources will help the government and businesses to make evidence-based decisions through data analysis and multistakeholder consultation.
- It will promote the alignment of work with other initiatives such as the Plastics Pact and governance instances as the National Roundtable for the Sustainable Management of Plastics.
- It will support the adoption and implementation of the Global Treaty to End Plastic Pollution as well as the objectives of Colombia's National Determined Contribution (NDCs) and National Biodiversity Strategy and Action Plan (NBSAP).

## Key Facts

- **Delivery partner:** World Economic Forum
- **Geography:** National level
- **Implementing partners:** WWF
- **Operation in Colombia:** 2024 - 2026
