

# Climate and Nature

Tackling climate change and biodiversity loss is a top international priority for the UK.

The Science and Technology Network (STN) play a central role in understanding and addressing climate change and threats to the environment.

Cross-sectoral action is required to address climate change, with Science and Technology driving collaborations across government, business, academia, and civil society.

## STN Climate and Nature Initiatives:

- Promoting global action on climate change and biodiversity loss.
- Sharing knowledge on priorities like ending coal power, preventing deforestation, transitioning to electric vehicles, building adaptation, and mobilizing finance.

- Accelerating the global transition to Net Zero emissions by 2030.
- Strengthening adaptation to climate change effects.
- Reversing biodiversity loss and promoting sustainable resource use.
- Tackling pollution.
